

Peter Humaidan

Prof. Humaidan is a specialist in reproductive endocrinology, professor at The Fertility Clinic, Skive Regional Hospital, Faculty of Health Aarhus University.

Peter Humaidan obtained his doctoral degree (DMSc) from the University of Aarhus, Denmark, focusing on the role of LH during the follicular and luteal phases in controlled ovarian stimulation. During his scientific work, he has primarily focused on developing individualized ovarian stimulation and luteal phase support protocols. ICOS (individualized controlled ovarian stimulation), therefore, is an integral part of his clinical work. His research interests include GnRH agonist trigger, OHSS prediction and prevention, luteal phase support in ART, and reproductive endocrinology.

He is the founder of the international society “The Copenhagen GnRHa Triggering Workshop Group”, which has published several articles on the use of GnRHa trigger. Moreover, he is the co-founder of the Poseidon Group, which proposed a novel stratification of the low prognosis ART patients.

Prof. Humaidan is currently deputy of the ESHRE SIG for endocrinology and has co-authored 300 plus papers (H-index 73 at Google Scholar) in peer-reviewed international journals. Peter Humaidan has a wide scientific network and is frequently invited as a speaker at international conferences.
